

please mandate tamper proof black boxes along with rigid enforcement of all hours of service rules.....  
that's all that needs to be done.....  
please mandate tamper proof black boxes along with rigid enforcement of all hours of service rules.....

zero tolerance for carriers that abuse this.....

put the carriers out of business who abuse it habitually and make damn well sure they don't start up again with the same executives and different decals on the doors.....

make it so our cdl has to be inserted into the black box for the truck to move and all data is transmitted by satellite feed to a national network of computers.....

put transponders at all state lines and on all vehicles and don't let the carriers cry and no exemptions.....

you people want to help make the roads safe, put some teeth in the law and enforcement.....

underqualified, underpaid, inexperienced drivers cause a lot of carnage out there and the only way to cure it is to cut down on hours and get drivers home.....

before deregulation there were no 48 state irregular route truckload carriers keeping drivers away from home for weeks at a time.....

are lives worth the additional costs that the carriers are going to pass on to the country???????

give the carriers a carrot by creating lcv lanes cross country and make them the most heavily enforced.....

mikeee
